

IN THE CLAIMS

1-8. (Canceled).

9. (Cancel).

10. (Previously Presented) A pressurized aerosol can containing an aerosol composition which comprises a biliquid foam, an aqueous phase and a propellant.

11. (Previously Presented) A process for preparing an aerosol can containing an aerosol composition which comprises a biliquid foam, an aqueous phase and a propellant, and which comprises adding the aqueous phase to a vessel, adding the biliquid foam to the vessel and mixing, and filling an aerosol can with the addition of a suitable propellant.

12. (New) An aerosol composition which is a polish and comprises a biliquid foam, an aqueous phase, a propellant and a wax.

13. (New) An aerosol composition which is an air freshener and comprises a biliquid foam, an aqueous phase, a propellant and a perfumed component.

14. (New) An aerosol composition which is a repellent and comprises a biliquid foam, an aqueous phase, a propellant and an active repellent agent.

15. (New) An aerosol composition which is one of a pre-shave preparation, a post-shave preparation and a shaving preparation and comprises a biliquid foam, an aqueous phase, a propellant, a fatty acid, a base, a surfactant and a humectant.

16. (New) An aerosol composition which is a follicle softener and comprises a biliquid foam, an aqueous phase, a propellant and at least one of surfactants, lubricants, humectants, foaming agents, fragrances, fatty acids and bases.
